PROFESSIONAL SUMMARY

Professional with over 3 years of working experience involved in all phases of software development seeking to combine practical experience in a dynamic IT environment; dedicated to team success in both individual and group settings; possess excellent problem-solving skills & research abilities and a strong background in software development, databases and Microsoft's Technology Stack.

WORK EXPERIENCE

Cognizant Technology Solutions   8th Oct 2018 — 1st Aug 2019

Programmer Analyst

The Football Association

Matchday, a mobile application for managing grass root football in England. Boot out all the paper and desk work while Matchday does it automatically and securely on your mobile. Whether you are a player, parent, team manager or coach, Matchday from 'The FA' makes your football life silky smooth. Enjoy the game while Matchday organizes everything

1) Developed APIs for showing status of LIVE matches in the app.
2) Developed APIs to display payment dues of players for signed up matches.
3) Worked on key enhancements on security improvements for the application
4) Coordinated on the post deployment audit processes as well

Environment : C#.NET, Azure Logic Apps, API Management

Prolifics Corporation   4th July 2016 — 3rd Oct 2018

Associate Software Engineer

Hudson Capital Market

This Project mainly involved creating SSIS Packages for Hudson Advisors for their daily ETL Operations. We created Packages for their Daily ETL Data Loads as per their Business Requirement and Handled all types of Errors Gracefully. We used SQL Jobs to Automate these Data Loads both on-premise and on cloud. In Complex Business Scenarios, we used the help of C#.NET and PowerShell to bridge gaps where SSIS couldn't help us.

I was awarded best performer (RACE Award) thrice for developing low latency, High data loading system using Microsoft stack which includes C#.NET, PowerShell, SQL Server, MSBI-SSIS, Azure SQL Warehouse, Azure Functions, Azure Logic Apps and hands on Amazon Redshift.

Environment: Azure Data warehouse, Azure Functions, Azure Logic Apps, SSIS Packages, SQL Server 2012, C#.Net, PowerShell, Third Party DLL's.

Roles and Responsibilities:

·Designed and handled the Data Conversion process (ETL) using SSIS

·Migration of Data from Azure to Amazon

·Coordinating with the On-Site Team/Business unit.

·Involved in Application Development

·Involved in Database Development and Code refactoring

·Automated ETL Process with SQL Jobs

·Involved UAT support & Production support on issues.

·Involved in Database Development and Architecture

·Build and deployment, Client Communication

VOLUNTARY WORK

- **Microsoft Student Partner | Student Trainer   March 2015 - April 2016**
Student Partners are a global group of on-campus ambassadors who are eager to help fellow students, lead in their local tech community, and develop technical and career skills for the future. I Trained students on various Microsoft Technologies like WinForms, Universal Windows Applications using Win10.

- **Firefox Student Ambassador | Firefox Trainer   March 2015 - April 2016**
Mozilla India is one of the largest volunteer-led organization having 16000 community members and having ambassadors from 560 campuses to build a better Internet for everyone. I Trained Students on Web technologies like HTML5, CSS3, JS. Started a programming club in my college and developed apps on Firefox OS

EDUCATION

MEng - Software Engineering   Sept 5, 2019 — Sept 1, 2020
University of Western Ontario

CERTIFICATIONS

Certified Blockchain Developer - Got Certified from BlockChain Council on January 27 ,2018

PERSONAL ACHIEVEMENTS

- Won " RACE " Award Twice for outstanding performance in our team and for being part of our department's success.
